SAS for Windows Installation Instructions

This page provides instructions on how to download and begin the installation for SAS Order Number <u>9CW32G</u>,

To Download and Install SAS for Windows:

- 1. Create a new folder on your computer's desktop named SAS in which to save the SAS installer.
- 2. Download the full version of SAS and the latest SAS license file.
 - The file size is **28.9 Gigabytes**. Average **download time** is **about 2 hours** if you are **off-campus**, depending on your internet connection speed, and about **40 minutes** when using an **on-campus** Ethernet connection.
 - PLEASE NOTE that the example file names in the screen shots may differ from those in your installation.

3. Once the installer has been downloaded, extract the files into the SAS folder you just created on your desktop. Right-click on the SAS9.4 file and select **Extract All**.

5. Follow the on-screen prompts to install SAS and perform any customizations to your installation.

Please note: The SAS installer may report that the imbedded license file is expired. If this happens please go to the **Renewing Your SAS License** section on the SAS download page and download the latest SAS license file (for your Tech Support Site Number) to your desktop. When SAS prompts for a new license you can browse to the license file that you just downloaded.

If you need assistance while installing SAS, please contact ITS Customer Support at 213-740-5555 or <u>consult@usc.edu</u>.
